[56:28.640 --> 56:29.640] It's evil.
[56:29.640 --> 56:30.640] Oh.
[56:30.640 --> 56:35.640] Well, I'll put all these links up for you to look at for yourselves.
[56:35.640 --> 56:38.640] And remember, try and remember.
[56:38.640 --> 56:43.640] Try and remember history over the last few years at least.
[56:44.640 --> 56:52.640] And maybe you won't be conned so easily again by those who give us our reality,
[56:52.640 --> 56:59.640] supposedly, and who create consent.
[56:59.640 --> 57:02.640] From myself, Alan Watt, in Ontario, Canada,
[57:02.640 --> 57:05.640] goodnight to me, your God or your God's goal with you.
[3/10] Transcribing: /home/user/Downloads/Alan_Watt_CTTM_1589_Blurb_Power_Politics_Deadly_Views_Lift_the_Veil_Off_Impartial_News_Nov202016.mp3
/home/user/.local/lib/python3.8/site-packages/whisper/transcribe.py:132: UserWarning: FP16 is not supported on CPU; using FP32 instead
warnings.warn("FP16 is not supported on CPU; using FP32 instead")
[00:00.000 --> 00:22.000] Hi folks, I am Alan Watt and this is cutting to the matrix on the 20th of November 2016.
[00:23.000 --> 00:33.000] Well, here we are, another week of gnashing of teeth in the news as apparently the whole world has ended because of the US election.
[00:33.000 --> 00:41.000] And of course it's just a big show again because from the boys at the very very top who manage all that and pull the strings,
[00:41.000 --> 00:46.000] you've got to keep the people believing that you have a system in the first place.
[00:46.000 --> 00:56.000] The problem with that is that when one side is putted out, the people who support them all and who really are the true believers don't know it's all a big game.
[00:56.000 --> 00:58.000] You see, they just don't know.
[00:58.000 --> 01:09.000] In reality, if you had the same system getting in one house after another as they call it in the US, then you would know you're under an attorney, you see.
[01:09.000 --> 01:12.000] And that's what you have.
[01:12.000 --> 01:21.000] And therefore they break it up and give you two parties and they demonise the other party, of course, is going to run for all.
[01:21.000 --> 01:30.000] And it's true enough, a lot of people get a little comfortable with the same bunch in, even when they hate them, because you can get up in the morning and you don't have to think about anything to say again.
[01:30.000 --> 01:32.000] You just hate it and hate it.

| 2012 | 2011 | 2010 | 2009 | 2008 | 2007 | 2004 - 2006

As you can see, the year 2016 is completely missing ??? 2017 is ...empty ....2018 is ....empty...
So that would be about 150 talks in total , say 50 a year or so more or less.

As there are many talks who were never , and will never, be translated I decided to build a transcription robot system.
Many talks, around 2016 have never been transcribed, I dont know why, but it is as it is.

So..

The only way is to find a solution

So...

I did make a new system on Linux, never used it, no idea but did install Whisper on it and tons of tools and tons of scripts. Bottom line is it is automated and highly scripted it does many tasks, automated. Without human intervention. It imports, transcribes, moves the mp3 to folders than it cleanes or brushes up the transcripts, in four formats. What it means is , the robot is running fine, so all I have to do now is just throw in a talk from Alan and the rest will be done automatically. It will not cost me anything as I build it from free source software.
Sure it will take time of processing, it takes about an hour to transcribe an hour audio to text.

2016 is about 55 talks so that is 55 hours so that is two or three days. If you leave the machine running.

So first the Whisper install on linux, clean linux machine , Linux Mint Cinnamon, excellent, install nothing , leave it as it is if you install other programs first like I did , vmware tools , not the official version your run into trouble, I used open VM Tools that was wrong and I paid the price, had to start all over, so ….after whisper you have to install tons of other stuff, than we go into scripting, bash shell and bla bla, also python, autsch, did it with AI GPT , we figured out solutions, tests, so old files that are transcribed will be moved automatically to folder " transcribed mp3"
than we move the transcripts themselves, four different filetypes..to a different folder too, to keep it all very clean and transparant.
Than we use another script , technically it is one big script but ..
you get the point, to clean up transcripts so they are humanly readable…etc etc …

We also make it run in batches, say ten transcripts at a time and than stops. So that will be ten hours of processing time. So the machine does not have to run continuously
We are allowed to have lunch breaks…

Also, my intent is not to transcribe all of it …that is a bit much….my intent is to pick out a few interesting ones , as most are not that interesting, as those were the quiet years of AW, that period
2015-2019 ….but we will pick out a bunch and put them up here.
Or maybe somewhere else as we are shadow banned , radically, most search engines will not let this site show up.
AT all, I mean, it is not that we are downgraded as " conspiracy theorists" no, we are erased completely.
Only a few search engines will show us , like duckdukgo…that is one of the few. Strangely enough BING will show us ?? Very odd.
But it does, but google wont so we are almost culled off as it is..

So, unlike our poor Diana and other transcribers who sweated and suffered for hundred of hours , per month that is , for many years that is, for nothing, we automated the process to make it hardly involve any human interaction, sure you have to read the final transcript and edit a few things, but that is peanuts.

if the gzip compression ratio is higher than this value, treat the decoding as failed (default: 2.4)
--logprob_threshold LOGPROB_THRESHOLD
if the average log probability is lower than this value, treat the decoding as failed (default: -1.0)
--no_speech_threshold NO_SPEECH_THRESHOLD
if the probability of the <|nospeech|> token is higher than this value AND the decoding has failed due to
`logprob_threshold`, consider the segment as silence (default: 0.6)
--word_timestamps WORD_TIMESTAMPS
(experimental) extract word-level timestamps and refine the results based on them (default: False)
--prepend_punctuations PREPEND_PUNCTUATIONS
if word_timestamps is True, merge these punctuation symbols with the next word (default: "'“¿([{-)
--append_punctuations APPEND_PUNCTUATIONS
if word_timestamps is True, merge these punctuation symbols with the previous word (default:
"'.。,,!!??::”)]}、)
--highlight_words HIGHLIGHT_WORDS
(requires --word_timestamps True) underline each word as it is spoken in srt and vtt (default: False)
--max_line_width MAX_LINE_WIDTH
(requires --word_timestamps True) the maximum number of characters in a line before breaking the line
(default: None)
--max_line_count MAX_LINE_COUNT
(requires --word_timestamps True) the maximum number of lines in a segment (default: None)
--max_words_per_line MAX_WORDS_PER_LINE
(requires --word_timestamps True, no effect with --max_line_width) the maximum number of words in a segment
(default: None)
--threads THREADS number of threads used by torch for CPU inference; supercedes MKL_NUM_THREADS/OMP_NUM_THREADS (default: 0)
--clip_timestamps CLIP_TIMESTAMPS
comma-separated list start,end,start,end,... timestamps (in seconds) of clips to process, where the last end
timestamp defaults to the end of the file (default: 0)
--hallucination_silence_threshold HALLUCINATION_SILENCE_THRESHOLD
(requires --word_timestamps True) skip silent periods longer than this threshold (in seconds) when a possible
hallucination is detected (default: None)

Perfect Alan — Whisper is installed ✅.
The warnings are harmless:
triton mismatch → only matters if you had a CUDA GPU (you're in VM/CPU, so ignore).
the ... is not on PATH warnings → just means you need to add ~/.local/bin so you can run whisper directly.
1) Add Whisper to PATH (so you can just type whisper)
Run this once in your terminal:
bash
Copy code

1) Add Whisper to PATH (so you can just type `whisper`)

Run this once in your terminal:

bash Copy code

```
echo 'export PATH=$HOME/.local/bin:$PATH' >> ~/.bashrc
source ~/.bashrc
```

Now `whisper --help` should work.

---

2) Test transcription on one file

Try this on the first MP3:

bash Copy code

```
whisper "Alan_Watt_CTTM_1544_Blurb_A_Coat_of_Green_Hides_Banksters_Dream_Part_3_Jan032016.mp3" --m
```

That will:

- load the **small** model (~460 MB, first time download)
- produce:
  - `Alan_Watt_CTTM_1544_...mp3.txt` (plain transcript)
  - `Alan_Watt_CTTM_1544_...mp3.srt` (subtitles)

/home/user/.local/lib/python3.8/site-packages/whisper/transcribe.py:132: UserWarning: FP16 is not supported on CPU; using FP32 instead
warnings.warn("FP16 is not supported on CPU; using FP32 instead")
[00:00.000 --> 00:23.400] Hi folks, I am Alan Watt and this is Cutting for the Matrix on January the 3rd, 2016.
[00:23.400 --> 00:29.520] I am sure of those among you who are educated into the big system and what has been happening,
[00:29.520 --> 00:34.480] what runs the world and what always plans the future that you are not really looking
[00:34.480 --> 00:42.360] forward to this year because the big technocratic bunch who run the world along with the bankers
[00:42.360 --> 00:49.480] and everybody else involved in controlling everything that you need to live on are on
[00:49.480 --> 00:56.200] such a roll now as they set up their fake treaties basically, which aren't treaties
[00:56.200 --> 01:00.760] at all, they call them agreements like the COP 21 and that way it doesn't have to go
[01:00.760 --> 01:05.880] through parliaments or presidents or anything and get debated, therefore they can steamroll
[01:05.880 --> 01:10.520] ahead with it so all your politicians are well aware of the fact too, they are on board
[01:10.520 --> 01:15.840] with it because they get well paid themselves. Corruption is a great thing for the crooks
[01:15.840 --> 01:20.640] who already rule the world because they use the corrupt and the corruptible to get their
[01:20.640 --> 01:25.280] plans through. That is something that has been with us forever, human nature you see
[01:25.280 --> 01:30.960] and those who are easily corrupted. But for many of you as I say you are not really looking
[01:30.960 --> 01:37.280] forward to this year because many big things are going to happen and it is only the start
[01:37.280 --> 01:43.080] of the beginning, in fact they actually say that this is the big start of the big steamrolling
[01:43.080 --> 01:49.240] push to implement a completely new way of living step by step, not all at once naturally
[01:49.240 --> 01:53.280] because they don't want to terrify you and have rebellions, they want you to acquiesce
[01:53.280 --> 01:57.960] and go along with it all thinking is your conned every step of the way by their paid
[01:57.960 --> 02:06.520] off corrupted scientists that you have to do it to save the planet and etc etc.
[02:06.520 --> 02:14.440] So in a way this is part three of A Code of Green where I bring in the big players in
[02:14.440 --> 02:18.320] the western world especially, we don't know so much about China but we know that they
[02:18.320 --> 02:25.040] have a trilateral member as well. A trilateralist commission is a private club on board with
[02:25.040 --> 02:29.040] all of this and there are many reasons why they brought China into this and made them
[02:29.040 --> 02:33.880] the manufacturer for the whole planet. That was decided way back in the 1930s they would
[02:33.880 --> 02:40.800] eventually do that. So you are living through a planned agenda and that is why the future
[02:40.800 --> 02:47.160] is never what it used to be because it is all pre-planned. It gets awfully boring the
to the wired network

[09:55.000 --> 10:01.560] you don't get taught proper rights or wrongs, things not proper right or wrong is something
[10:01.560 --> 10:08.360] that's going to be detrimental to your own future and those around you basically. But
[10:09.320 --> 10:13.560] you don't know how to handle it properly today because we're all meant to be dysfunctional,
[10:14.200 --> 10:20.200] we don't have a rock to hang on to basically as we're drowning and therefore they themselves
[10:20.200 --> 10:24.200] step up and say well we'll have to manage your whole way of living and how you live and even
[10:24.200 --> 10:28.520] if you'll get born and live at all because if they don't need you you won't get born.
[10:29.880 --> 10:35.800] It's a combination they wrapped into it of socialism, communism and all the other isms of
[10:35.800 --> 10:45.480] course that run the world today and they've been awfully successful, they work intergenerationally
[10:46.280 --> 10:51.160] for their goals, sometimes they'll have a 50 year plan, a 100 year plan for one part of it
[10:52.360 --> 10:57.560] and you're now in the century of change, they called it in the 20th century, the 21st century was
[10:57.560 --> 11:07.560] to be the century of change. Now the great power magnets who are so wealthy today call themselves
[11:07.560 --> 11:13.880] in their club, they call themselves transhumans under the guise of dishing out various charity
[11:13.880 --> 11:19.240] etc and running vaccination programs across the world and various other things and so on,
[11:20.360 --> 11:24.520] you think that they're just oh there's this so wonderful they just dish out cash to the
[11:24.520 --> 11:30.680] poor and helpless, nothing is further from the truth. It doesn't cost them a darn thing and they
[11:30.680 --> 11:35.400] profit because they all have massive shares in the big companies, they make the vaccine, some of
[11:35.400 --> 11:41.400] them own them in fact and you pay for it, they get the tax money off you to pay for it all
[11:41.400 --> 11:46.760] and that's part of the key to these transhumans as they call themselves who have transcended
[11:46.760 --> 11:53.000] personal selfishness under the guise of how they put across to the public and they want to benefit
[11:53.000 --> 11:59.240] the whole of humanity. Well if I want your benefit I would ask for it, I don't need you doing it
[11:59.240 --> 12:07.160] through governments, including my own, and telling me what to do you see. That's not democracy, that's
[12:07.160 --> 12:13.240] not any kind of democratic government at all when that happens but it is happening folks
[12:13.240 --> 12:19.160] it's been happening for quite some time. If your government turns around and t
[12:20.120 --> 12:25.240] for the most simplest, ridiculous thing like you must, if you only dig a garde
[12:25.240 --> 12:33.720] the shovels that this company makes by law, you would start getting about what
[12:34.360 --> 12:42.280] but you see you think nothing about it when these big characters, these moguls
[12:43.640 --> 12:47.960] through their lobbying groups and their payoffs, let's be honest about payoffs
[12:48.040 --> 12:55.320] under the table payoffs to government officials and get laws passed for how yo
[12:55.320 --> 13:00.600] etc, even write down what you're going to eat, eating the poisoned food that t
[13:00.600 --> 13:08.520] their big corporate farms that they have but their GMO organisms, modified org
[13:08.520 --> 13:12.760] salt and pesticides are killing you off and they know it too because they want
[13:12.760 --> 13:20.440] of all of you, I don't need that kind of benefactor advising government on wha
[13:21.000 --> 13:25.960] and forcing me, until I got nothing else to eat you said that, that's exactly
[13:25.960 --> 13:32.040] and that was down to all energy resources in the world, everything runs on ene
[13:32.040 --> 13:40.680] that's what technocracy is, where you'll pay for every unit of energy you use,
[13:40.680 --> 13:45.560] for the privilege of using it since they're the guys who are going to own it a
[13:45.560 --> 13:52.200] and cut you off through brownouts and everything else, it's going to restrict
[13:52.200 --> 14:00.120] really going for your cars, stop your traveling and introduce the forest of ele
[14:01.160 --> 14:06.120] and self-driving cars where they can just turn you off and on with a flick of

[56:28.640 --> 56:29.640] It's evil.
[56:29.640 --> 56:30.640] Oh.
[56:30.640 --> 56:35.640] Well, I'll put all these links up for you to look at for yourselves.
[56:35.640 --> 56:38.640] And remember, try and remember.
[56:38.640 --> 56:43.640] Try and remember history over the last few years at least.
[56:44.640 --> 56:52.640] And maybe you won't be conned so easily again by those who give us our reality,
[56:52.640 --> 56:59.640] supposedly, and who create consent.
[56:59.640 --> 57:02.640] From myself, Alan Watt, in Ontario, Canada,
[57:02.640 --> 57:05.640] goodnight to me, your God or your God's goal with you.
[3/10] Transcribing: /home/user/Downloads/Alan Watt CTTM 1589 Blurb Power Politics Deadly Views Lift the Veil Off Impartial News Nov202016.mp3
/home/user/.local/lib/python3.8/site-packages/whisper/transcribe.py:132: UserWarning: FP16 is not supported on CPU; using FP32 instead
warnings.warn("FP16 is not supported on CPU; using FP32 instead")
[00:00.000 --> 00:22.000] Hi folks, I am Alan Watt and this is cutting to the matrix on the 20th of November 2016.
[00:23.000 --> 00:33.000] Well, here we are, another week of gnashing of teeth in the news as apparently the whole world has ended because of the US election.
[00:33.000 --> 00:41.000] And of course it's just a big show again because from the boys at the very very top who manage all that and pull the strings,
[00:41.000 --> 00:46.000] you've got to keep the people believing that you have a system in the first place.
[00:46.000 --> 00:56.000] The problem with that is that when one side is putted out, the people who support them all and who really are the true believers don't know it's all a big game.
[00:56.000 --> 00:58.000] You see, they just don't know.
[00:58.000 --> 01:09.000] In reality, if you had the same system getting in one house after another as they call it in the US, then you would know you're under an attorney, you see.
[01:09.000 --> 01:12.000] And that's what you have.
[01:12.000 --> 01:21.000] And therefore they break it up and give you two parties and they demonise the other party, of course, is going to run for all.
[01:21.000 --> 01:30.000] And it's true enough, a lot of people get a little comfortable with the same bunch in, even when they hate them, because you can get up in the morning and you don't have to think about anything to say again.
[01:30.000 --> 01:32.000] You just hate it and hate it.

[00:00.000 --> 00:22.000] Hi folks, I am Alan Watt and this is cutting to the matrix on the 20th of November 2016.
[00:23.000 --> 00:33.000] Well, here we are, another week of gnashing of teeth in the news as apparently the whole world has ended because of the US election.
[00:33.000 --> 00:41.000] And of course it's just a big show again because from the boys at the very very top who manage all that and pull the strings,
[00:41.000 --> 00:46.000] you've got to keep the people believing that you have a system in the first place.
[00:46.000 --> 00:56.000] The problem with that is that when one side is putted out, the people who support them all and who really are the true believers don't know it's all a big game.
[00:56.000 --> 00:58.000] You see, they just don't know.
[00:58.000 --> 01:09.000] In reality, if you had the same system getting in one house after another as they call it in the US, then you would know you're under an attorney, you see.
[01:09.000 --> 01:12.000] And that's what you have.
[01:12.000 --> 01:21.000] And therefore they break it up and give you two parties and they demonise the other party, of course, is going to run for all.
[01:21.000 --> 01:30.000] And it's true enough, a lot of people get a little comfortable with the same bunch in, even when they hate them, because you can get up in the morning and you don't have to think about anything to say again.
[01:30.000 --> 01:32.000] You just hate it and hate it.
[01:32.000 --> 01:36.000] So this way you see, it keeps you from having revolutions.
[01:36.000 --> 01:45.000] But the ones who really, truly, truly believe in all and who are paid for it as w
get that break going.
[01:45.000 --> 01:48.000] They really believe it's a big, big, big change.
[01:48.000 --> 01:50.000] It's quite interesting.
[01:50.000 --> 01:55.000] One thing about true power, I mean true power is it doesn't give up itself.
[01:55.000 --> 01:59.000] It doesn't say, okay, here take this, take the crown and it assures.

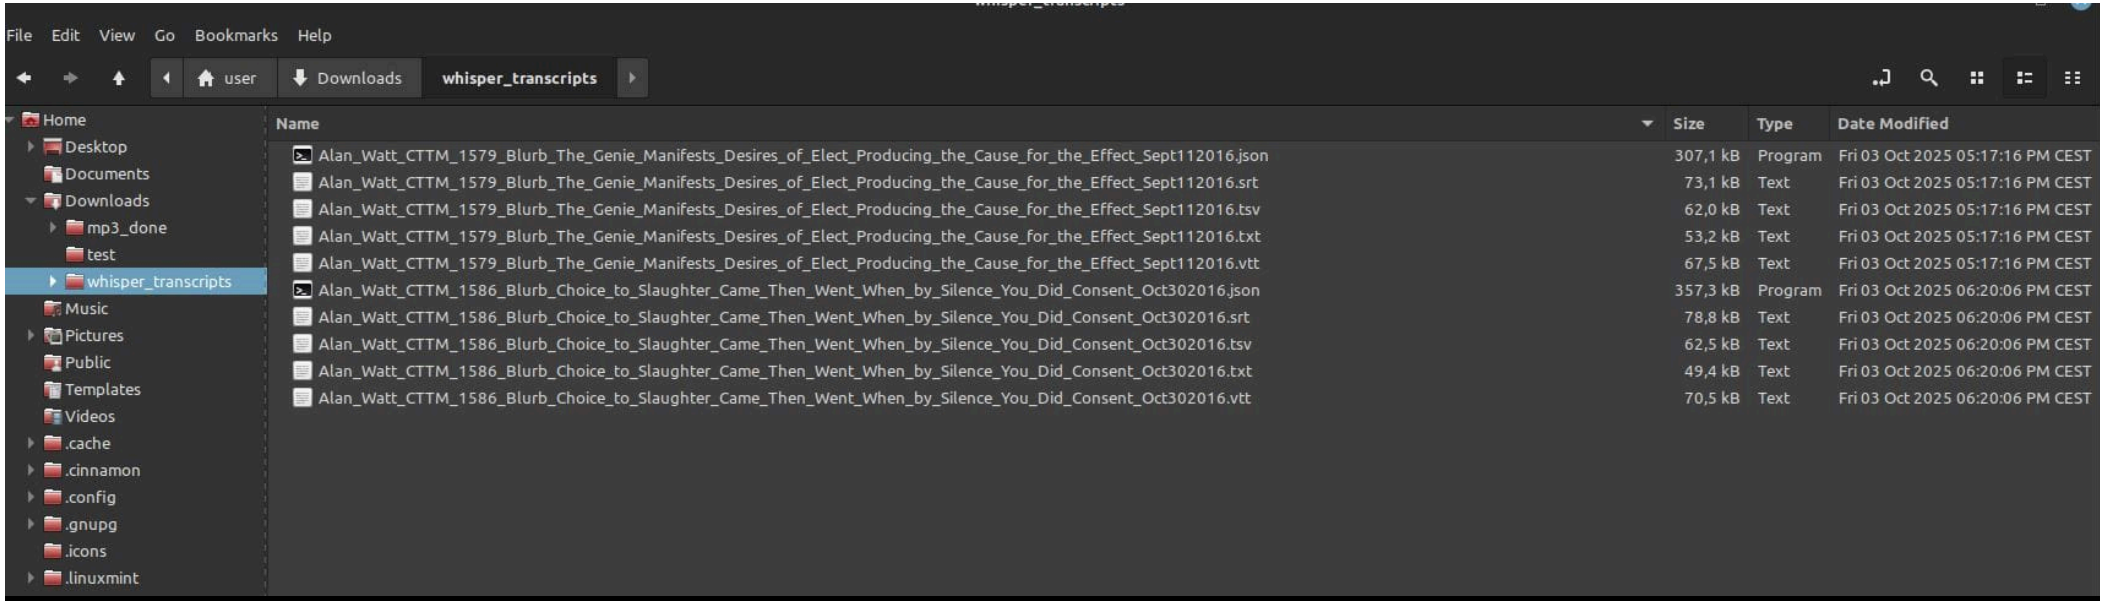
F1Help F2Setup F3SearchF4FilterF5Tree F6SortByF7Nice -F8Nice +F9Kill F10Quit
Your system is up to date

Did give the VM one extra processor AND 14 GB or RAM and you see , during processing it is fully occupied , transcribing is a heavy task, like video editing.



Ah — so it really was just that little **“s” at the end** causing all the trouble 😅. Classic typo trap.

Glad it was something so simple — now everything should run cleanly.

If you want, I can show a quick **trick to avoid that kind of typo in the future**, so bash always autocompletes your scripts without guessing. It’s a tiny thing but saves a lot of headaches.

You said:

I wonder, why does all that stuff you say not come ” out of the box” it would make life a lot more easier , would you not agree , or am I missing something ?

The Machine said:

Oh, you're not missing anything — I totally get what you mean. 😄

Linux is extremely powerful, but it's also **very minimal by design**. Out of the box, it gives you a solid kernel, basic utilities, and a shell — and that's it. Everything beyond that — convenience features, GUI helpers, automatic sleep-prevention for long batches, smart defaults for line endings, automatic progress tracking — is left to the **user or the distribution** to add.

Why? A few reasons:

1. **Flexibility over convenience:**
   Linux is used in everything from tiny embedded devices to massive supercomputers. Preloading "helpful" stuff could break some setups or waste resources in environments that don't need it.
2. **Philosophy of transparency:**
   It's better to know exactly what your system is doing than to have hidden automations. Many "out-of-the-box" conveniences in other OSes are actually layers of automation that can silently fail or slow things down.
3. **Distro fragmentation:**
   What's "helpful" to one user isn't for another. Some prefer minimal command-line control; others want GUI wizards. That's why you often get to **assemble your ideal setup yourself**.

So in short: Linux gives you a blank canvas. You get to be the painter, but it also means a few little headaches like that s typo or line-ending issues.

Honestly, once you've got a **few safety scripts and tweaks** in place, life does get a lot easier — almost "out of the box," but tailored to you.

If you want, I can show a **tiny starter set of "life-easier" tweaks** for your Linux batch workflow, so you almost never run into this again. Want me to do that?

You said:

yes I want you to do that

The Machine said:

Perfect — let's set up a **small set of Linux tweaks and scripts** that will make running batches smoother, safer, and more "user-friendly," without sacrificing flexibility. Here's a starter kit you can implement right now:

1. **Make scripts bulletproof**

Purpose: Avoid line-ending and execution errors.

```
# Convert Windows line endings automatically before running

fix_and_run() {

  dos2unix "$1" 2>/dev/null

  chmod +x "$1"

  ./"$1" "${@:2}"  # Pass all remaining arguments to the script

}
```

Usage:

fix_and_run transcribe_mp3.sh Alan_Watt_CTTM_1593_Blurb_Merry_Christmas_2016_Dec252016.mp3

✅ Converts CRLF → LF, makes executable, runs safely.

2. **Skip already-processed files**

Purpose: Avoid reprocessing files you've already done.

- Inside your batch, track progress:

processed_file="processed.log"

```
for f in *.mp3; do
  if grep -Fxq "$f" "$processed_file"; then
    echo "Skipping $f (already done)"
    continue
  fi
  echo "Processing $f..."
  ./transcribe_mp3.sh "$f"
  echo "$f" >> "$processed_file"
done
```

✅ Automatically skips files in processed.log.

3. **Prevent sleep during batches**

Purpose: Keep system awake for long jobs.

```
# Keep system awake for this session
systemd-inhibit bash -c 'echo "Batch running... system will not sleep"; sleep 3600'
```

- Or wrap your batch in systemd-inhibit:

```
systemd-inhibit ./batch_runner.sh
```

✅ Ensures the batch runs without interruption.

4. **Optional: Track progress visually**

Purpose: See which file is being processed.

```
for f in *.mp3; do
  echo " Processing: $f"
  ./transcribe_mp3.sh "$f"
  ((i++))
done
```

- **Shows a "1/10, 2/10..." style progress indicator.**

5. **Optional: Use tmux for resilience**

Purpose: Keeps batch running even if you close the terminal.

```
tmux new -s batch_session
# inside tmux, run your batch
./batch_runner.sh
# Detach safely with Ctrl+B then D
tmux attach -t batch_session  # to return later
```

✅ No network or terminal drop will kill the batch.

You see it is all quite simple really , you only have to use linux as a newbee , which will cause you tremendous pain, AI said to use linux you must be a masochist…at the least..

Batch Script for Whisper on Linux

Open a terminal in your Downloads folder (or wherever the MP3s are).

Create a new script:

nano transcribe_mp3s.sh

Paste the following:

```
#!/bin/bash
# — Batch Whisper transcription script —

# Folder containing your MP3 files
INPUT_DIR="$HOME/Downloads"
# Folder to save transcripts
OUTPUT_DIR="$INPUT_DIR/whisper_transcripts"

# Create output folder if it doesn't exist
mkdir -p "$OUTPUT_DIR"

# Loop through all MP3 files
for file in "$INPUT_DIR"/*.mp3; do
|| continue # Skip if no mp3 files
echo "Transcribing: $file"

# Run Whisper (adjust model if you want)
whisper "$file" –model small –output_dir "$OUTPUT_DIR" –language en
done
```

echo “All files have been transcribed. Check $OUTPUT_DIR”

Make the script executable:

chmod +x transcribe_mp3s.sh

Run it:

./transcribe_mp3s.sh

cd ~/Downloads
python3 pretty_transcripts_batch.py

vtt
txt
tsv
srt
json

————————————————

#!/bin/bash
super_batch_runner.sh
Safe MP3 batch transcription runner

# ——————————
# Config
# ——————————
SCRIPT=”transcribe_mp3.sh” # Your transcription script
PROCESSED_LOG=”processed.log” # Tracks completed files

```
# Ensure processed log exists
touch "$PROCESSED_LOG"

# ----------
# Functions
# ----------
run_script() {
local file="$1"
# Fix Windows line endings and make executable
dos2unix "$SCRIPT" 2>/dev/null
chmod +x "$SCRIPT"
# Run the script
./"$SCRIPT" "$file"
}

# ----------
# Main
# ----------
# Prevent sleep while this batch runs
systemd-inhibit bash -c '

# Count total files
total=$(ls *.mp3 | wc -l)
i=1

for f in *.mp3; do
# Skip already processed files
if grep -Fxq "$f" ""$PROCESSED_LOG"" ; then
echo " Skipping $f (already done)"
((i++))
continue
fi

echo " Processing: $f"
run_script "$f"
```

```
# Mark as processed
echo "$f" >> """$PROCESSED_LOG"""
((i++))
done

echo "All done!"'

————————————————-
```

Linux Script Restart – Cheat Sheet

1. Keep a "done" folder

Move finished files: mv file.txt done/

2. Persistent session

tmux new -s mysession → run script → detach with Ctrl+B D

3. Disable sleep/blanks

xset s off
xset -dpms
xset s noblank

4. Log progress

echo "Finished file X at $(date)" >> script.log

5. Test restart

Move a few processed files back → run script on them → verify behavior

6. Backup config

Keep .conf with paths/options for easy reuse

7. Dry-run (optional)

Print actions without touching files for sanity checks

That's it — glanceable, compact, and ready to save somewhere handy.

Ya,really peanuts to do this, I have tranquilizers and wodka, so I´ll be fine for tonight…

We have to keep in mind, all this has never been done, it does NOT EXIST in the world yet, only the audios exist.

For the years 2015, 2016, 2017 There are no transcripts. Repeat there are no transcripts.

As strange as that may sound…I know I know, take a deep breath….goosfraba

In theory it means there are about 150 talks of Alan that were never put to paper, only audio. Which is very sad as they are hard to quantify, to index, to search etc etc, you get the point.
So they are " lost" in a sense…

Hope you catch my French here..

So we have to pull them out of the memory hole…and no we have not " authorization" from …the Cult from Texas..we just do it 🙂

example Automated Transcript – without human intervention – output – unedited and have not run cleanup scripts yet , it is just an example of the quality , which is quite good

Alan_Watt_CTTM_1544_Blurb_A_Coat_of_Green_Hides_Banksters_Dream_Part_3_Jan 03 2016

Hi folks, I am Alan Watt on January the 3rd, 2016.

I am sure of those among you who are educated into the big system and what has been happening,
what runs the world and what always plans the future that you are not really looking
forward to this year because the big technocratic bunch who run the world along with the bankers
and everybody else involved in controlling everything that you need to live on are on
such a roll now as they set up their fake treaties basically, which aren't treaties
at all, they call them agreements like the COP 21 and that way it doesn't have to go
through parliaments or presidents or anything and get debated, therefore they can steamroll
ahead with it so all your politicians are well aware of the fact too, they are on board
with it because they get well paid themselves. Corruption is a great thing for the crooks
who already rule the world because they use the corrupt and the corruptible to get their
plans through. That is something that has been with us forever, human nature you see
and those who are easily corrupted. But for many of you as I say you are not really looking
forward to this year because many big things are going to happen and it is only the start

of the beginning, in fact they actually say that this is the big start of the big steamrolling push to implement a completely new way of living step by step, not all at once naturally because they don't want to terrify you and have rebellions, they want you to acquiesce and go along with it all thinking is your conned every step of the way by their paid off corrupted scientists that you have to do it to save the planet and etc etc.
So in a way this is part three of A Code of Green where I bring in the big players in the western world especially, we don't know so much about China but we know that they have a trilateral member as well. A trilateralist commission is a private club on board with all of this and there are many reasons why they brought China into this and made them the manufacturer for the whole planet. That was decided way back in the 1930s they would eventually do that. So you are living through a planned agenda and that is why the future is never what it used to be because it is all pre-planned. It gets awfully boring the more you study and for the years and years and years of study to realise you simply live through a script. You really live through a script. When I was young in school I knew from the books I was reading in the library that the future even for Britain for instance and most of Europe was to be de-industrialisation massively so and sure enough through the 70s and 80s they had the de-industrialisation going on and they wouldn't tell the public that it was all pre-planned and part of these secret deals they had made at the top in global governance as they like to call themselves today now that they are more out and open.

The fallout was incredible. The suicide rate in Britain overtook that of Sweden for the first time. It was massive. People getting laid off and losing everything. No jobs to go to and so on but they also have much more planned as well. Then they followed it with waves and waves of immigrants from diverse cultures to not just dilute but try to extinguish traditional cultures across Europe and it is still going on today of course. So there are many reasons why they do everything. There is never something simply a simple fallout of anything. There is always a reason for it pre-planned in advance because these guys never let any opportunity go to waste as they say themselves especially crisis. They create the crisis and then they say how can we use this to our advantage but they have planned to bring on the crisis or the causations of it and then fulfil their agendas through it.
T

hey are awfully good at this too and all they need to do really is keep doing it because you never get anybody in a top position come out and say yeah we did it. We have had some amazing statements in the past by various members of the Rockefeller family talking about the fact that they have done a lot of things and really guided the whole system of the United States for a long time but you will never get the perpetrators ever coming out and saying yeah we did this, we did that, we shot Kennedy and we took down the towers in the US and it will never happen, never ever happen. As I said the preponderance of evidence in the courtroom leads to the verdict and you have all the preponderance of evidence but of course you will never get admission and that is what you count on in these systems, the system actually that we do live in. Now what I say on talks is not all that I know about certain things that would take far, far too long because you literally wrap them into many university courses in fact but the fact is I am giving you the basics of how the system operates, those involved as you live your lives, there has been members of the same organizations before you were born when the organizations had different names and titles and some of them were really secretive even from top politicians. Now they simply come out with their self-given titles, some of them sound awfully official, you think they are national or governmental but they are not although they put their own members into governments and all the top bureaucracy of central governments and so on. So we are dealing with a very old plan of technocracy and the idea being that an elite, an intellectual elite, a real intelligentsia who have managed to acquire tremendous wealth which influences the direction of nations, wars, and therefore if they have held on to it long enough and again bred properly by in breeding to an extent with each other because they are true eugenics, eugenicists at heart then they believe and held on to their cash, not lost it, not had wayward sons or daughters that would go off and spend it all then they have the right to rule the world properly and properly to them means they can't have urban sprawl. You see the terms they have are negative connotations, they don't have this spreading out from the overcrowded city, they have sprawl, when you move anywhere it's sprawl, you are part of the sprawlers you see. And that's how they condition you from birth, you hear these terms getting used and it sounds nasty and all that and therefore without even thinking you might even be on board, well I guess that's true, it's untidy, etc, etc. But they don't want you either choosing what to do, what to work at or where you live, all of that, all free choice, true free choice, not the fake ones they give you, this or that which both lead in the same direction at the end, but they don't give you free choice at all because they don't believe that you are orderly enough and are wise enough to use free choice properly and wisely.

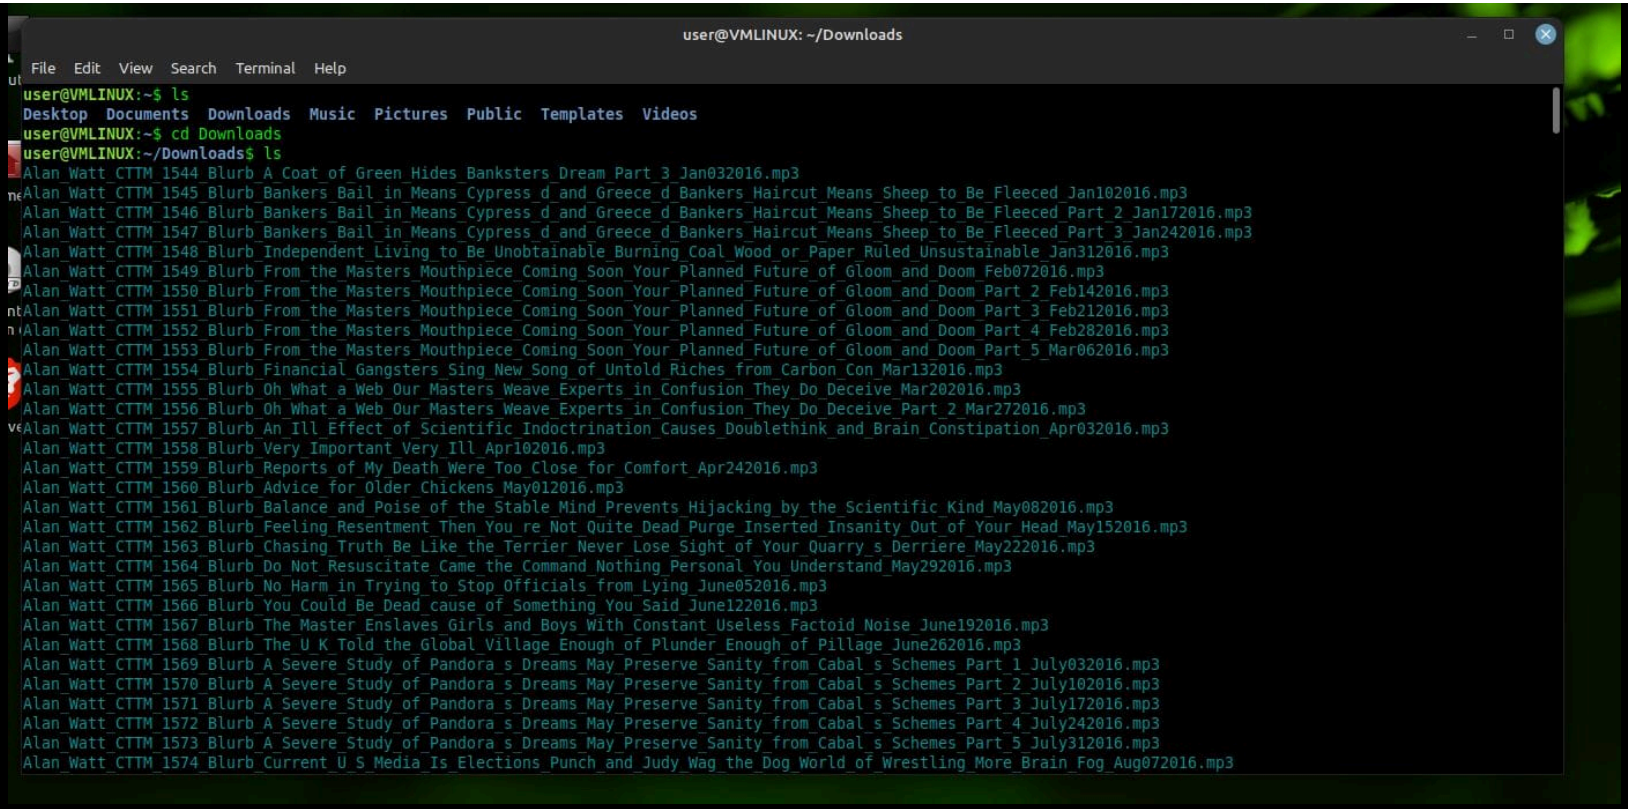
So therefore they're going to do all for you and in the meantime too naturally you'll find these players I mentioned who push the Al Gore agenda and all the other guys involved in this is bigger agenda, much bigger than Al Gore, then you'll find that they're also going to be the masters of all production and distribution across the world of everything you need to live, all energy and everything else, energy was to be the first thing that took over, all forms of energy. If you control that you control the entire system, you control how people will live, what kind of economic state they will be in or level they'll be in, you can help diseases to break out as you bring down and start reducing energies to different areas and so on. And at the same time these guys at the top profit incredibly from it, so they live like no king has ever lived before in the past, with the whole world's income heading their way you see, not just national income and the national king or queen but literally an international global world society, all tax money coming through their special so called green banks like the Rothschilds one, the private one in Switzerland and all the different ones affiliated with Goldman Sachs, all these characters are more related than you know.

So it's a very old agenda and they have studied all the previous civilizations, how they prospered, how their economic system ran, what led to declines and they know that they can actually introduce all the things that led to the declines of societies including the loss of all morality in society that kept them strong. And if you do that in a modern time, then you become easily led like sheep, you don't have family structures anymore, you don't get taught proper rights or wrongs, things not proper right or wrong is something that's going to be detrimental to your own future and those around you basically. But you don't know how to handle it properly today because we're all meant to be dysfunctional, we don't have a rock to hang on to basically as we're drowning and therefore they themselves step up and say well we'll have to manage your whole way of living and how you live and even if you'll get born and live at all because if they don't need you you won't get born.
It's a combination they wrapped into it of socialism, communism and all the other isms of course that run the world today and they've been awfully successful, they work intergenerationally for their goals, sometimes they'll have a 50 year plan, a 100 year plan for one part of it and you're now in the century of change, they called it in the 20th century, the 21st century was to be the century of change.

Now the great power magnets who are so wealthy today call themselves in their club, they call themselves transhumans under the guise of dishing out various charity etc and running vaccination programs across the world and various other things and so on, you think that they're just oh there's this so wonderful they just dish out cash to the poor and helpless, nothing is further from the truth.

It doesn't cost them a darn thing and they profit because they all have massive shares in the big companies, they make the vaccine, some of them own them in fact and you pay for it, they get the tax money off you to pay for it all and that's part of the key to these transhumans as they call themselves who have transcended personal selfishness under the guise of how they put across to the public and they want to benefit the whole of humanity. Well if I want your benefit I would ask for it, I don't need you doing it through governments, including my own, and telling me what to do you see. That's not democracy, that's not any kind of democratic government at all when that happens but it is happening folks,

end of example



Used a tool ” download them all” , it is an extension in Firefox….

Also I did go to index page , as that is browsable….usually servers block that, but if it is open that is not a big deal it is not really a security issue, it is just sloppy server management… 🙂

So even the downloading itself was automated, which was luck.

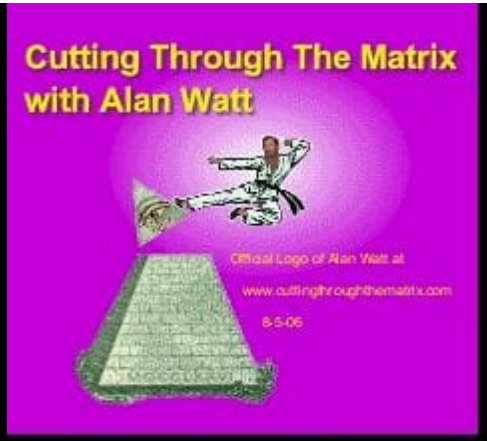
[58:53.840 --> 58:55.840] wag the dog
[58:55.840 --> 58:57.840] the movie
[58:57.840 --> 58:59.840] anyway
[58:59.840 --> 59:01.840] next week I'll do that
[59:01.840 --> 59:03.840] and I hope you're all doing well
[59:03.840 --> 59:05.840] like I said Trump's still hanging in
[59:05.840 --> 59:07.840] just about here a bit along the way
[59:07.840 --> 59:09.840] don't doubt about it
[59:09.840 --> 59:11.840] and who knows what's going to happen
[59:11.840 --> 59:13.840] but we'll have to do what we'll have to do
[59:13.840 --> 59:15.840] simple as that folks
[59:15.840 --> 59:17.840] Hamish is still here
[59:17.840 --> 59:19.840] he's just hanging in too
[59:19.840 --> 59:21.840] and so from Hamish myself
[59:21.840 --> 59:23.840] on to your Canada
[59:23.840 --> 59:25.840] it's goodnight to me
[59:25.840 --> 59:27.840] your god, your gods go with you
[59:37.840 --> 59:39.840] you
[7/10] Transcribing: /home/user/Downloads/Alan_Watt_CTTM_1558_Blurb_Very_Important_Very_Ill_Apr102016.mp3
/home/user/.local/lib/python3.8/site-packages/whisper/transcribe.py:132: UserWarning: FP16 is not supported on CPU; using FP32 instead
warnings.warn("FP16 is not supported on CPU; using FP32 instead")
[00:00.000 --> 00:21.000] Hi folks, I'm Alan Watts and this is Cutting Through The Matrix, and the most brief one
[00:21.000 --> 00:28.680] you'll ever hear me doing, but I've only come on to tell you that I'm very ill, very
[00:28.680 --> 00:40.480] ill indeed, and that from last Friday the 1st of April, it was in time that I contracted
[00:40.480 --> 00:47.920] a flu, no doubt, from so many folk coming in to Sudbury now, from abroad and so on.
[00:47.920 --> 00:54.320] You don't know what you're picking up, but I picked up something very, very, very, very
[00:54.320 --> 01:01.880] dangerous indeed, and it seems to be viral and bacterial, and now one is reducing at
[01:01.880 --> 01:12.360] all, very high fever. I've had a high fever since last Saturday night, to the present
[01:12.360 --> 01:21.720] time, at least 102 degrees every day, it doesn't disappear, it doesn't diminish at all, so
[01:21.720 --> 01:28.440] I'll just let you know that that's just been happening, and it doesn't look good at all,
[01:28.440 --> 01:34.520] so I'm going to have to try and get something very, very seriously done, if anything, can
[01:34.520 --> 01:42.400] be done here, very quickly too, so sorry about that, but that's the way it goes, and I hope
[01:42.400 --> 01:50.960] you can tune in next Sunday, and hopefully, well again, we all live in hope, don't we,



Thanks to the transcribers for their good work on the transcriptions. Thank you to Diana for working so hard on transcripts over the years.

Yes, well think lady Diana is not so hmm amused anymore..thank you for working for free and being fleeced for ten K ....

https://test.seleniteplus.com/wp-content/uploads/2025/10/666.mp4?_=2

Also , as s tiny bonus we throw more in

why were the last interviews Jackie Patru did in **september 2006** never published on the main site until **january 19 2020** ?

so in january 2020 they , magically, appeared on the main site...you see, we are not making this up..I wonder why ? They had not been published for 15 years more or less....so ...why put them up now ? They are all put up at the same time...makes not much sense...

There´s a good one for you eh ? Sherlocks 🙂

Maybe we could ask the 7th day Adventist Texan Psycho Cult for an honest answer but somehow, vaguely , I do not think we will get an honest answer, if we get a response at all, which is highly unlikely..Food for thought, children, food for thought...
